

## Complete Turn-key Storage Solutions

Biogas • Biofuels • Biomass

### MEETING THE INCREASING DEMAND FOR RENEWABLE ENERGY

When components and options for state of the art Bioenergy Storage Solutions are needed, turn to Greatario for biomass and digester tanks, aluminum domes and specialty covers. Greatario can provide the data and information required to make the right tank coating and cover technology for any BioEnergy application.

#### At GREATARIO, we offer:

- Complete line of storage tanks and covers for anaerobic digesters
- Storage tanks and silos for biofuels
- Storage silo and reclaimer systems for biomass handling
- Custom engineered to meet developer specifications
- Extensive types of process solutions

#### Why choose GREATARIO for BioEnergy Storage?

- Faster construction
- Low maintenance
- Cost effective
- Turn-key Design-Build
- Expandable
- Relocatable

## WE HAVE IT COVERED!

**GREATARIO'S** Bioenergy Storage Solutions include the industry's best cover options for biomass, biogas and digester tank applications. We can provide the appropriate design to address key factors including corrosiveness, mixer loads, pressure, vacuums or other ancillary equipment loads.

#### Roof Options for BioEnergy:

- Aluminum Dome
- Dual Membrane Roof
- Externally Supported Roof (ESR)
